As pertains to healing in the thought of the Maya*

*Tonal Acupressure Energy Healing
For Clearing and Activation of Energy Meridians*

Introduction

Humankind, our world, our universe and all existence is composed of energy from Source. The Mayans teach this and now the science of a new physics concurs and confirms this ancient knowledge.

Today we will learn of the Mayan knowledge, beliefs and techniques of accessing Source and how to act as portals, or concentration points of Source Energy, to heal ourselves and others.

This course will graphically explain the primary patterns and relationships involved as the energies travel from Source through the cosmos to enter your physicality. The double torus (shown on left) is the marvelous mechanism that transports the energies from Source, through the universes to your bodies.

The new physics from "Crossing the Event Horizon" confirms the teachings from the Mayan Cosmology involving the magnetic grid, gravity, linear time and the electromagnetic grid.

It is imperative that you understand the patterns and relationships of the divine matrix as you become a portal for healing and activation. Each energy stream has a divine purpose from the mind of Creator that aids you on your human Earth Walk. Mayan Cosmology from the Ancient Ancestors is the only complex study I have found of these vital forces that activate and nourish our life force, our emotional bodies, our intellect and our physicality. As you step into this world of Mayan thought, you will be given the tools that transform your lives in dynamic ways and gain a total understanding of our wholeness and how our physicality is activated and supported by Source.

The important aspect to remember is that you are not the healer, you are becoming the portal of divine healing energies and keeping your own energy body cleared will allow your frequencies to raise so that you vibrate faster and can portal the highest strength of these energies. It does not happen overnight, you must grow into the abilities to become a portal of the highest vibrations. Yeshua Ben Joseph, (Jesus) taught us that we will someday do more powerful work and healing that he was able to demonstrate while on the planet. This is that time period. Miracles abound with just a thought and intention when you vibrate at the highest rate in this dense dimension.

You will be taught to work with the frequencies which now match your energy, but know that they will increase as you work with them in your daily life. You can portal energy to yourself and your family, your plants, pets, and environment in each moment. As you become a walking portal of energies in the now moments of your life, change and healing happens everywhere you appear.

Taos of Science and the Maya

- Torus grid is a mathematical graph and has 8 vertical circles, each with 7 points.
- No crossings occur, but when projected onto a flat plane, 40 crossings are created.
- This allows for the 20 energies of the Tzok'in and 20 energies of the stars to combine in sets of 3 to enter our solar system through the sun and activate life on our planet.
- The 2nd graph shows 6 points combining into 1 as the energies are stepped down for our planet and our human bodies.
- This allows the energy to automatically enter the single points of the acupuncture meridians of our bodies at each moment of the day.
